CTC Polisher
Low Volume Benchtop Fiber Polisher

CTC can be used at the benchtop or in the field. The unique layout of the unit enables easy handling. No previous experience is needed to operate the unit.

CTC is the first non-rotational production unit that can be used for PC, APC, and FTB polishing.

CTC offers the unique "Flex-Positioning System" that is used to adjust models of ULTRA TEC equipment. This "System" allows for easy height and position control that is needed for different bench and types of connectors.

Ready to Go
The standard package for the unit comprises all the items you need for polishing – just add the connector or resilient fiber you need.

Product Highlights

- Benchtop unit
- Bring already-mated connectors up to current industry requirements
- Low-noise when polishing of connectors, terminal contacts
- Cost-effective polishing
- The use of 2" disks that are the machine makes it extremely compact.

CTC

FTTX Portable Fiber Polisher

Developed for "in-field" and "one-off" applications, the FTTX portable connector trim or corner polisher from ULTRA TEC provides the performance required by installation professionals for the FTTx, LAN, CTC, and mobile/trip-based applications.

Non-rotational polishes are readily achieved due to a robust design and system built along with using the latest technology.

The polisher can be held at any desired angle during operation. This allows for non-portable operation in small workspaces, cross-connects, fiber racks and wire closets. The unit can be operated with either a battery pack or a power supply both included with standard package.

Product Highlights

- Rotational polishing
- Long already-mated connectors up to current industry requirements
- Use anywhere
- Non-portable machine, with battery power
- Benchtop stand converts polisher for small production use in the factory

CTC Polisher

Low Volume Bench-top Fiber Polisher

CTC can be used at the bench-top or in the field. The simple logistics of the unit make it extremely user-friendly. No previous experience is needed to operate the unit.

CTC is a low to medium volume production unit that can be used for PC, APC, and Flat polishing.

CTC utilizes the unique 'Fiber Positioning System' that is shared by other models of ULTRA TEC equipment. This 'System' allows for easy height and pressure control that is needed for different brands and types of connectors.

Ready to Go

The standard package for the unit incorporates all the items you need for polishing – just add the connector or related holders you need.

Product Highlights

- Retro-polishing –
Bring already-installed connectors up to current industry requirements
- Low to medium volume polishing of connectors, termini and contacts.
- Cost-effective polishing –
The use of 2 inch films on the machine make it extremely cost-effective

FTTx Portable Fiber Polisher

Developed for 'In-the-field' and 'Retro-Polishing' applications, the FTTx portable connector/termini/contact polisher from ULTRA TEC provides the performance required by installation professionals for the FTTx, LAN, CATV, and Aircraft/shipboard applications.

Industry-standard polishes are readily achieved due to a robust design and system build along with using the latest techniques.

The polisher can be held at any desired angle during operation. This allows for true portable operation in small workspaces, cross-connects, fiber nodes and wire closets. The unit can be operated with either a battery pack or a power supply (both included with standard package).

Product Highlights

- Retro-polishing – bring already-installed connectors up to current industry requirements
- Use anywhere – true portable machine, with battery power
- Bench-top stand – converts polisher for small production use in the factory
