ÄngströmBond® 9123 High Temperature Fiber Optic Epoxy

#### Description:

AnqsтröмBondA 9125 is a very fast curing, high temperature optical connector adhesive. This low viscosity system produces a very high strength bond for glass, metal, ceramics and most plastics. This epoxy utilizes the most popular chemistries used for terminating connectors. Its very high glass transition temperature allows it to pass the most stringent pistoning specifications. It has excellent temperature cycling capabilities and will withstand high humidity environments.
